

WTW EDITION

PRO-STRETCH fabric acoustic wall treatment system by **eomac**

eomac supplied and installed PRO-STRETCH fabric acoustic wall treatments in White River Cinemas throughout the UK. A custom shape was produced to create a layer on the sidewalls, wherein LED lights were tucked in between the layer and the sidewall. PRO-STRETCH installations significantly improved the acoustic standing of the auditoria. All the high traffic areas were finished with PRO-TECT fibre wallcovering to keep White River Cinema walls free of damage and looking new for years to come.
